

ABOUT INCROUTER

InCruiter is a fast-growing **AI-powered Stack Interview Intelligence Platform** helping organizations hire smarter and faster using automation and AI-driven intelligence. With six products spanning interviewing, assessment, and hiring automation, we're redefining how companies recruit at scale.

InCruiter is a market leader and one of India's Top 3 players in this segment, with a wide range of clients across domestic and international markets. Our major clientele includes some of the large enterprises and Startups like **EXL, Welspun, Dentsu, Manhattan Associates, ArcelorMittal, Telstra, Siemens**, and so on.

ROLE OVERVIEW

Position Name : AI Agent Builder / Researcher

CTC : As per company standards

Experience : 6months-1Year

We are looking for a technically strong **AI Agent Builder / Researcher** to drive **AI-led digital transformation within the organization**. The role involves researching emerging AI tools and building **AI agents and automation workflows** to improve internal productivity, automate processes, and enable smarter business operations.

EXCITED ABOUT YOUR TASKS?

- Build and deploy **AI agents and LLM-powered automation workflows** for internal use cases.
- Should have developed or implemented min. **4 to 5 AI Agents** as a side project or as a full time role.
- Research emerging **AI frameworks, tools, and agent architectures** and evaluate them for business applications.
- Identify manual workflows across teams and implement **AI-driven automation solutions**.
- Integrate AI agents with internal systems such as **CRM, ATS, APIs, and databases**.
- Prototype and test **AI-powered tools to enhance operational efficiency**.

WHAT WILL YOU NEED TO SUCCEED?

- Must have experience in building **AI agents or LLM-based applications**.
- Strong programming skills in **Python or Node.js**.
- Hands-on experience with **LLM frameworks** (LangChain, AutoGen, LangGraph, etc.).
- Knowledge of **RAG architecture and vector databases** (Pinecone, FAISS, Weaviate, Chroma).
- Experience integrating **APIs and automation workflows**.

Preferred Skill?

- Experience with **AI voice agents, chats or n8n automation platforms.**
- Familiarity with **AI orchestration and tool-calling agents.**
- Strong curiosity for experimenting with **new AI technologies.**

WHY JOIN INCRUITER?

- Build and lead **AI-first recruitment products and agentic AI tools** in shaping the future of hiring.
- Work directly with the **founders and leadership** on product vision and execution.
- Culture that rewards **speed, ownership, and innovation.**
- Competitive salary and fast-track growth in a scaling startup.
